

FOR IMMEDIATE RELEASE:

Beahm Designs Inc. Relocation Plan Serves To Reinforce Customer Satisfaction Initiatives *Bay Area Catheter Equipment Supplier Relocates to Increase Manufacturing Capacity for Existing and New Products.*

Los Gatos, Ca. (July, 2014); Beahm Designs Inc. today announced plans to relocate to a larger facility in Milpitas, Ca. to hone its specialized manufacturing processes, support expanding product lines and provide enhanced customer training. The relocation effort will be complete on July 31, 2014.

Specialized Manufacturing Space

The new facility allows Beahm Designs to better align manufacturing practices with the artistic nature of its medical device customers. The additional space will accommodate Beahm Designs' "tailor-made" machine design and manufacturing operations, which encompass the customer-centric business model Beahm Designs is known for. The machine building staff and CNC machine shop will also reside in the new 11,000 square ft. facility, strategically located in the heart of the Bay Area.

Additional Space for Additional Offering

Beahm Designs currently offers several branded product lines including the Beahm Hot Box and Beahm Bonder series. A planned sequence of new product offerings will leverage Beahm Designs hallmark Hot Air Technology and industry standard functionality.

Future Training Facility

Designed to address the artsy nature of equipment use, a fully-equipped onsite training center is scheduled for completion in 2015. Customers will have access to a range of additional services to eliminate out of the box issues, and to further employ the opportunity to identify, iterate and perfect their specific processes for the best possible user experience.

Anita Beahm, CEO, commented "This relocation is inspiring many new initiatives and further extending our industry roots. The new facility will provide a means for productive customer engagement and thus bolster satisfaction"

Beahm Designs operations will continue uninterrupted throughout the relocation process. An open house is planned following Stage 1 reconstruction at the Milpitas facility.

About Beahm Designs
