

## FOR IMMEDIATE RELEASE:

### **New Catheter Equipment Showroom Open for Demonstrations and Trials**

*Medical Device engineers invited for hands-on demonstrations and equipment trials.*

**Milpitas, Ca.** – (January 22, 2018) Beahm Designs, Inc. announced today the unveiling of an equipment showroom for Medical Device engineers. Following the opening of the Silicon Valley work room, teams of Manufacturing and R&D Engineers, now have access to try the world's most user friendly, cost effective Catheter Manufacturing equipment.

The showroom is intended to create an individualistic experience to problem solving in a confidential hands-on environment. Additionally, Beahm Designs personnel will teach catheter processing engineers new techniques for optimizing manufacturing processes by way of increased yield and reduced cycle times. Beahm Designs' founder Brian Beahm draws upon thirty years of medical device industry experience to assist manufacturers in identifying the right materials, process equipment and proper tooling for their unique requirements.

Currently outfitted with an array of class leading Tube Bonding platforms, the showroom will open each quarter featuring equipment to address specific manufacturing processes such as Lamination, Tip Forming, Tube Flaring and Necking or Tube Reduction. The present display of Tube Bonding machines offers repeatably and strict control for Balloon Bonding, Lap Joints, Butt Joints and resources needed for any tube bond application.

Beahm Designs CEO Anita Beahm states "We're eager to offer hard working engineers with the opportunity to use their materials to test our equipment for proven and optimized results. We invite our customers to the Try-Before-You-Buy experience to prevent customers from investing in equipment with disappointing results. Since these manufacturing applications often require tailor-made solutions, it's important for us to collaborate with our customers, and sometimes that involves a hands-on approach".

Beahm Designs Catheter Equipment showroom is now scheduling appointments for the Tube Bonding installation and will feature a Lamination Equipment starting April 2018. More information is available at: [www.beahmdesigns.com](http://www.beahmdesigns.com).
